# Food_drink_menu Instruction

Day 43 – Food/Drink Menu

Challenge: Design an interactive menu for an online store or restaurant."

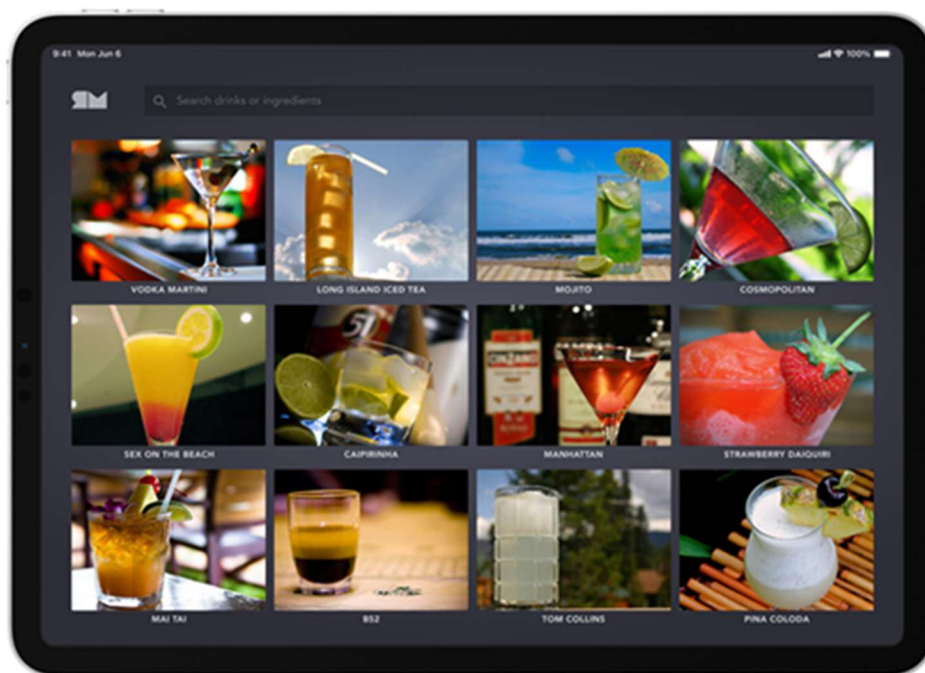

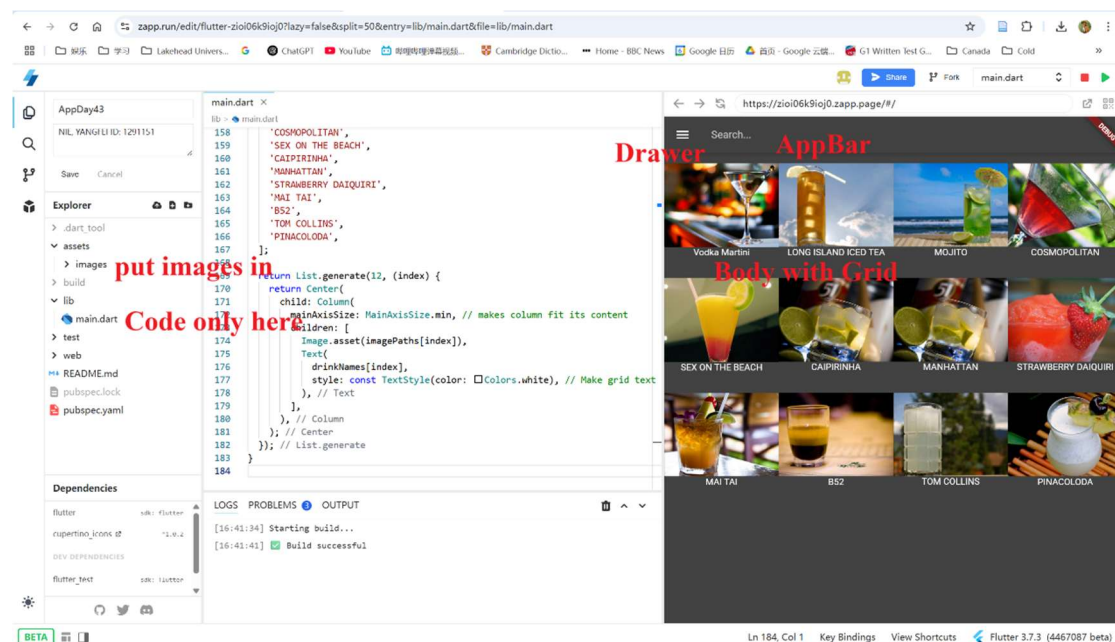

Design

Look at the following list and picture. Use scaffold to make code easy.

1. Goods. Use scaffold body. Use an image list and name list to store data. Use GridView to display.
2. Logo. Use scaffold drawer. And some items to show information.
3. Search bar. Use scaffold appBar as the searching component.
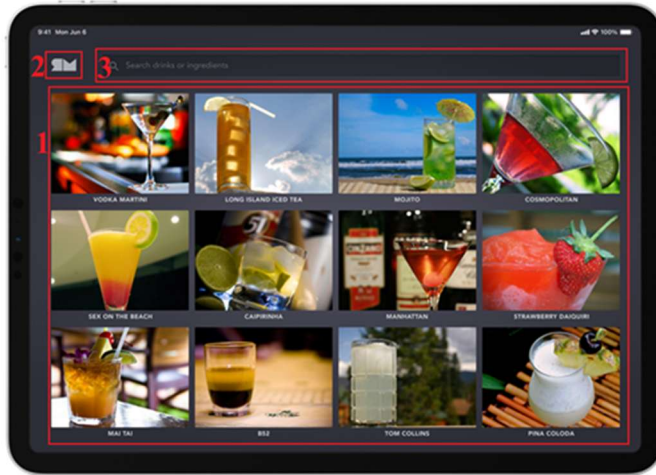

Code Heirachy

Clear to see. Code is in main.dart. Images in assets. Code is in scaffold and just used body, drawer and appBar components.

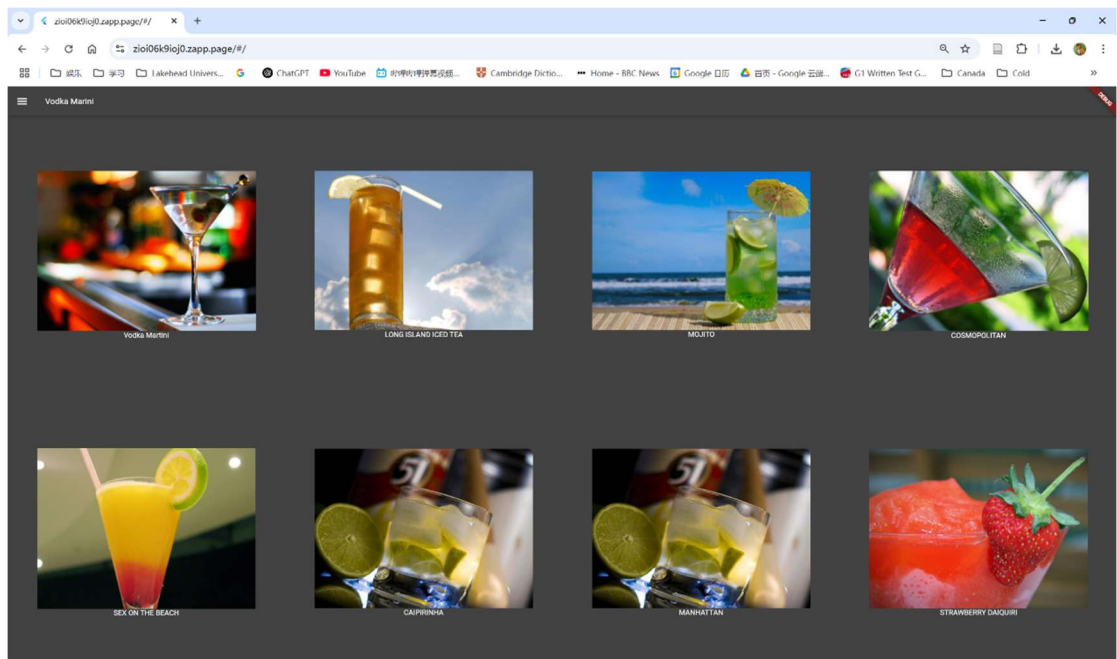

Screetshots

Main screenshot:

Search screenshot, supppose search Vodka Matini.

Drawer shot, see the left.
